

FRANCISCO GARCÍA MARRA

FULLSTACK WEB
DEVELOPER

SUMMARY

Due to COVID I had to reinvent myself and decided to jump in the world of developing. Started a Web Developer Bootcamp on March and today I'm a Fullstack Web Developer with experience in React-Redux.js, Node.js, Typescript.js, PostgreSQL, among others. This showed me that i can adapt to situations that pull me out of my comfort zone in a short period of time, I'm looking forward to find a job that fulfills my needs and challenges me to become a better professional and person.

TECH - SKILLS

- NodeJS - React - Redux - TypeScript

ACADEMIC EXPERIENCE

Mist App

Final Porject at Henry Bootcamp Client: Mlst

Development of the onboarding for the user of the marketplace, that includes the process to Sign up/Sign in/Sign Out, register the user in the database, allow the access to private content and customize all the services that the user will provide to the customers through the platform

The front-end was developed with React.js, RxJs and Typescript. In the back-end we used NodeJS, Firestore/Firebase, Cloud Functions /Firebase, Typescript, the authentication system was implemented with Authentication/Firebase and the styles were made with CSS, SASS and some frameworks such as MaterialUI and Bootstrap.

VideoGames App

Individual Project at Henry Bootcamp

Design and development of a Web App that allows the user to look for the videogames info provided by an API. The UI's include a landing page, a navigation bar, it includes de features to filter and sorting the list. The user can also add its own game which will be added to the database and shown in the UI.

The App was developed with React-Redux for the front-end and PostgreSQL, Express and NodeJS for the back-end and database. The styles were made purely with CSS.
